About Us.

elevating engineering excellence

At BM Engineering, we don't just machine components, we engineer confidence. We are a precision machining partner specializing in CNC and VMC machined parts tailored to the exact specifications of our clients across industries like hydraulics, automation, pumps, valves, robotics, automotive, and industrial machinery. From one-off prototypes to mid and high-volume production runs, we combine tight-tolerance accuracy, high-quality finishes, and reliable turnaround to deliver parts that perform where it matters most.

What We Do

- High-precision CNC & VMC machining
- Custom components in ferrous and non-ferrous metals
- Batch manufacturing with fast lead times and strict QC
- Tailored machining for valve blocks, actuator parts, recoil drums, bushings, end caps, manifolds, housings, flanges, brackets, and more

What We Deliver

Machining Capabilities

- CNC & VMC Precision Machining
- 3-axis, 4-axis and 5-axis milling
- Turning, drilling, tapping & boring
- Consistent tight tolerances up to ± 10 microns
- Batch sizes: Mid to high-volume production
- Materials: MS, SS, aluminum, brass, bronze, and much more!

Ancillary Services

We offer a wide range of surface finishing options to enhance durability, corrosion resistance, and aesthetics. These include various electrochemical/chemical finishes, powder coating, heat treatment and more.

Why Trust Us

- Multiple CNC turning centers and VMC machining centers.
- Thousands of components produced.
- Consistent achievement of tolerances up to ± 10 microns.
- Flexible production batch sizes.
- Strong presence in European export sector.
- Trusted by OEMs across Europe.

Our Philosophy.

We are not just mechanists; we stand for something.

Precision is our habit. Excellence is our promise.

At PrimaForge, we believe every component we machine is a reflection of trust. Our clients rely on us to build parts that don't just fit. They perform. Day in, day out. In real machines. In real conditions. Without fail, without compromise.

What Drives Us:

- **Craftsmanship Over Mass Production:** We're not chasing quantity. We're obsessed with quality. Every part goes through tight QC and hands-on attention.
- **Zero-Excuse Precision:** Tolerances aren't goals. They're requirements. We hit them. Consistently.
- **Deadlines Matter:** We respect your timelines. Whether it's a prototype or a recurring production batch, we deliver on time or we don't take the job.
- **Partnership First:** We don't just supply parts; we build long-term technical relationships. Our clients stay because they know we show up.

Let's build together!

Every part we deliver carries our commitment to elevating engineering excellence, precision, and partnership.

Let us show you what we can do.
